#### About Us

We supply Ferrous and Non-ferrous castings made at fully-automated/ semi-automated foundries located across Asia. The parts are manufactured as per the specification of our customers. We meet International standards such as ASTM, AISI, BS, DIN, and JIS by monitoring every step of the manufacturing process. Our foundries have the capacity to develop parts weighing from 0.500 Kg to 1000 Kgs as a single piece.

#### Production Process

#### Quality Control

Quality Control is one of the most important process in production. We insist that 100% inspection before shipment and ensure parts without any flaws when sending out.

We have complete quality inspection facilities including mechanical testing, chemical analysis, tensile strength, hardness, spectrometer, ultrasonic testing, etc.

#### FAQ

##### 1. Are you a manufacturer or a trading company?

We are a professional manufacturer with over 25 years' export experience for designing and producing vehicle machinery parts.

##### 2. How can I get some samples?

If you need, we are glad to offer you samples for free, but the new clients are expected to pay the courier cost, and the charge will be deducted from the payment for formal order.

##### 3. Can you make casting according to our drawing?

Yes, we can make casting according to your drawing, 2D drawing, or 3D cad model. If the 3D cad model can be supplied, the development of the tooling can be more efficient. But without 3D, based on 2D drawing we can still make the samples properly approved.

##### 4. Can you make casting based on our samples?

Yes, we can make measurement based on your samples to make drawings for tooling making.
