

Ductile Iron Sand Casting Spare Parts Manufacturing Services Tractor Accessories

Our Product Introduction

Basic Information

- Place of Origin: Mainland China
- Brand Name: NC4614
- Certification: ISO9001,CE,SGS
- Model Number: 4614
- Minimum Order Quantity: 100 pcs
- Price: Can talk
- Packaging Details: Wooden Case
- Delivery Time: 30 days
- Payment Terms: T/T, L/C
- Supply Ability: 60,000-80,000 pcs monthly

Product Specification

- Material: Ductile Iron
- Application: Tractor Accessories
- Process: Sand Casting
- Finish: Sand Blasting, Machining, Painting
- Size: As Per Drawing
- Standard: ASTM A536,ISO,JIS,ANSI,UNC

Product Description

Ductile Iron Sand Casting Spare Parts Manufacturing Services Tractor Accessories

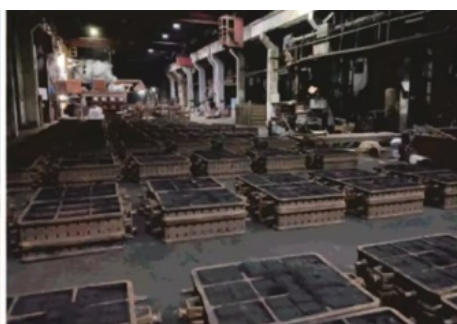

Product Details

Product Name	Ductile Iron Sand Casting Spare Parts Manufacturing Services Tractor Accessories
Casting Service	Sand Casting, Gravity Casting, etc.
Material	QT200, 250, HT250, Aluminum ADC12, etc (Aupon your requirements.)
Tooling Design	We have own R&D team to make customized tooling, usually 7-15days can be ready.
Standard	China GB high precision standard.
Surface Finish	Mill Finishing, Anodizing, Powder coating, Wood grain, Polishing, Brushing, Electrophoresis.
Drawing	3D Drawing: .step / .stp, 2D Drawing: .dxf/ .dwg / .pdf

Manual pouring production line

Mechanical pouring production line

Iron mold production line

The static pressure production line

About Us

Sunrise Foundry is a trusted leader in providing high-quality and innovative solutions. Our company specializes in manufacturing custom castings, precision-machined parts, and mechanical assemblies for a wide range of industries, including **automotive, rail, renewable energy, and industrial machinery**. We pride ourselves on our extensive experience in casting, with four advanced production lines designed to meet various production needs.

These include:

Iron Mold Casting Production Line: Ideal for high-volume orders, this line ensures the production of durable, cost-effective castings with fast turnaround times.

Resin Sand Casting Production Line: Perfect for smaller, high-precision orders or prototypes, this line produces castings with excellent surface finishes and dimensional accuracy.

Static Pressure Casting Production Line: Used for large, heavy castings that require high strength and durability, this line guarantees reliable, high-quality results.

Mechanical Casting Production Line: Specialized for producing mechanical components, including parts for automotive, pumps, and machinery.

FAQ

What types of products do you primarily produce?

Our main products include ductile iron, gray cast iron, and vermicular cast iron components used in automotive parts, reducer accessories, industrial pump parts, and more. We also offer CNC precision machining, mechanical surface finishing, mechanical baking varnish, welding, and heat treatment services.

Do you accept custom orders?

Yes, we specialize in custom production. We provide high-precision casting and machining services tailored to your specific requirements. Our team will work closely with you to ensure the products meet your exact specifications and quality standards.

How do you ensure product quality?

With 30 years of casting experience, we use advanced production equipment and rigorous quality control processes to ensure that every product meets international standards. All products undergo strict testing and quality checks before delivery to ensure they meet customer requirements.
