

## Alloy Steel Investment Casting Hydraulic Parts Hydraulic Rod End

Our Product Introduction

for more products please visit us on [greycastironcasting.com](http://greycastironcasting.com)

### Basic Information

- Place of Origin: China
- Brand Name: NC0932
- Certification: ISO9001,CE,SGS
- Model Number: 0932
- Minimum Order Quantity: 100 pcs
- Price: Can talk
- Packaging Details: Wooden Case
- Delivery Time: 30 days
- Payment Terms: T/T, L/C
- Supply Ability: 60,000 pcs monthly

### Product Specification

- Item Name: Hydraulic Rod End
- Material: Alloy Steel
- Process: Investment Casting
- Size: Customized
- Finish: Sandblasting
- OEM: Available

## Product Description

### Alloy Steel Investment Casting Hydraulic Parts Hydraulic Rod End

#### Product Details

Casting Type	investment casting, lost wax casting, silica solcasting.
Processing	Tapping , Milling, Grinding, Drilling, Cnc Machining
Casting Material	Aluminium alloy ADC12 A380 A356 ZL101 102 104
	Zinc alloy: ICE#1 #2 #3
	Stainless steel: 303 304 316
	Brass copper green tin copper
	Cast iron ball mill cast iron
Polishing Tech	Cast deburring machined surface treatment packaging
Surface Treatment	According to requirement
Tolerance	+/-0.02MM or as required by the drawing
Industrial	Mechanical parts Auto parts
	Vedical and electronic parts
	Communication parts
	artware
	Other precision parts

#### Investment casting (lost wax casting)

Investment casting services support casting weights ranging from 0.1kg to 50kg, suitable for complex shapes and high precision requirements. The lost wax process is used to ensure smooth casting surfaces and clear details. Our services include rapid prototyping and mass production to meet the needs of various industries.

#### About Us

we started sheet metal processing services and participated in the supply chain of famous Chinese bus production. With our processing experience, we can help reduce production costs and modify designs, and you can enjoy our best service.

Our factory continues to expand the types of processing. Currently, it can complete sheet metal processing, CNC processing, forging processing, casting processing, etc., complete your parts production in one stop, saving your time.

#### Quality Inspection

We strictly implement quality control standards in every processing link, and use high-precision measuring instruments to perform size

inspection, surface finish inspection, etc. to ensure that every part meets customer requirements.

CMM

Tensile Test Machine

#### FAQ

1. What types of casting services are available?

We offer a variety of casting services, including sand casting, investment casting, die casting, and other specialized casting processes. Each process is suitable for different materials and complexity requirements.

2. What are the minimum and maximum casting sizes?

Our casting services can handle castings of various sizes, with the minimum size usually being a few grams and the maximum size being hundreds of kilograms. The specific size can be customized according to your needs.

3. How to choose the casting process?

Choosing the right casting process depends on the complexity of the casting, the material requirements, and the production quantity. We will provide advice based on your specific needs and design to help you choose the most suitable process.

4. How long is the production cycle?

The production cycle depends on the complexity and batch of the casting. Generally, the production cycle from design confirmation to delivery is a few weeks to a few months. We will provide a detailed schedule at the beginning of the project. The sample time is about 7 working days.
